A working life

Lesson 1

1 Ask and answer

What do you know about a doctor’s job?

2 Read about two doctors. What is the same about their work? What is different?

My name's Dr Aziz. I work in a mobile health clinic. The clinic is in a van. We’ve got two nurses, two doctors and a driver in our team. We’ve been doing this job for five years. I really enjoy it. Some people live in villages far away from a doctor or a hospital, so we visit the villages twice a month. We examine people and give them medicine if they are ill. We haven’t got the equipment to do big operations in the van. If a patient is very ill, we can call an ambulance to take them to hospital. We also visit schools and teach children about their health.

I'm Dr Gamila. I work at a big hospital in Cairo. I finished studying at university six months ago, so I haven't been working here for very long. The hospital is very busy and today I started work at 6 a.m. It's very hard work, but I love my job. For the past hour, I've been talking to the patients. I've just visited a child who had an operation a few hours ago. It went very well. Her parents have been waiting to see her, so I'm going to tell them the good news.

3 Which of the words in red in the text mean the following?

1 a van that takes sick people to hospital  ambulance
2 a person that a doctor is helping to get better  patient
3 when doctors cut a person open to help them get better  operation
4 things that people use in order to do something  equipment

4 Answer these questions

1 How many people does Dr Aziz work with?
2 Why does the mobile health clinic visit schools?
3 When did Dr Gamila become a doctor?
4 Who has Dr Gamila just visited? Why?
Lesson 2

2 Complete the sentences with the present perfect continuous form of the verbs in brackets

1 The boys have been playing (play) on the beach all morning, so they are tired now.
2 Manal’s brother lives (live) in England for a year, so his English is very good.
3 I’m sure Hanan will do well in her test. She has been studying all weekend.

5 Have you been waiting (wait) for the bus for a long time?
6 You look tired. What have you been doing (do) for the last 30 minutes, I’ve been studying English.

3 Ask and answer about things you and friends have been doing:

2 for the last week.
3 for the last year or longer.

The present perfect continuous tense

  I have been reading a new book. (I’m still reading it. I haven’t finished it yet.)
  She has been studying English for five years. (She is still studying it now.)

- We also use the present perfect continuous to talk about actions that started in the past and have present results:
  It’s been raining all day, so the garden is very wet.

- We form the present perfect continuous with have / has (not) + been + verb -ing:
  We’ve been travelling for an hour. My father’s been working in the garden all morning. You haven’t been watching TV this week.

- We use question words or Yes / No questions with short answers:
  What has he been reading?
  Have you been eating ice cream? Yes, I have. / No, I haven’t.

How to achieve the best exam results!

Here is some useful advice to help you revise for your exams in any subject.

• You should always eat healthy food because it is good for the brain. What should you eat if you are hungry? You shouldn’t eat too many sweets. Choose nuts or fruit instead; they can improve your memory. You should also drink a lot of water.

• You should take a ten-minute break and do some exercise, such as walking every hour, because this improves your memory.

• You shouldn’t stay up too late at night. If you don’t get enough sleep, you won’t be able to remember all the facts that you’ve memorised.

• Think of ways to make your revision interesting. If you’re learning vocabulary, write the words on paper and stick it on the walls. Make lists and diagrams with important information and invent rhymes to help you remember them.

• Finally, try not to get too nervous before an exam. You’ll think more clearly if you relax!

3 Answer the questions

1 Why is it important to eat healthy food before exams?  
   *Because healthy food is good for the brain.*

2 Which two foods can help you when you are revising?

3 Why is it a good idea to take a break during revision?

- The form **should / shouldn’t** is the same for all subjects, singular and plural:
  
  *Students should always be polite.*
  
  *He shouldn’t speak Arabic in an English class.*

- The form of the Yes / No question is **should + subject + infinitive without to**:
  
  *Should I write my name on my paper? Yes, you should. / No, you shouldn’t.*

- We can also make questions using a question word:
  
  *When should I start to revise for the exam?*

**Complete the revision advice with should or shouldn’t**

1. You ___________ always make a revision timetable.
2. You ___________ study early in the morning if possible.

Subject: Holiday in Egypt

Hi Diana

I’m having a great time with my cousins in Egypt. They’ve been taking me to all the famous places. I’ve only been here for ten days, but I’ve seen so many things already. I’ve been collecting pictures, postcards and tickets from all the museums and other places we’ve been to. I’m making a holiday album so that I can show you everything when I get back home.

I’ve been helping my cousins to learn English, too. I told them that they should read lots of books and magazines in English. They should listen to English on the radio and they should try to watch television programmes in English, too. They have worked really hard. I think that their English is better already! They’ve been speaking it a lot more since I’ve been here!

My oldest cousin, Hazem, has been playing football every afternoon. He wants to play for his secondary school’s football team next year, so he’s been practising very hard. I should go now because it’s time for dinner!

See you when I’m back in England next week!

Leila

A man wasn’t hurt, but an accident shows that you shouldn’t use a phone when you are driving!

2 Read the magazine article and check your answers to exercise 1

Three schools

All children in Egypt have to go to school from the age of six to fifteen. They can go to nursery school from the age of four, but they don’t have to go. At primary and preparatory school, all students have to wear a uniform.

Most students practise sports or music after school. Many students also have private lessons. Although they don’t have to go to these lessons, many students go because they want to do well in their exams.

**Lesson 1**

1. **Ask and answer**
   
   What problems do people have when it is very hot?

2. **Look at the diagram and find:**
   
   1. things that you can burn. **fuels**.
   2. two things that cause pollution.
   3. something that trees breathe in.

3. **Read and complete the science magazine article with the bold words from the diagram**

4. **Choose the correct answer**
   
   1. Carbon dioxide is **a natural** / **an unnatural** gas.
   2. Global warming happens when the earth gets too **hot** / **cold**.
   3. Global warming **can** / **can’t** cause floods.
   4. With global warming, dry places will become **wetter** / **drier**.
   5. Cutting down a lot of trees **is** / **isn’t** good for the environment.

---

**Global warming**

*This week, Mr Mohsen, a science teacher, explains global warming to us.*

The **atmosphere** is the air around the earth. This contains different **gases**, for example: **carbon dioxide**.

You produce carbon dioxide when you burn **fuels**. Pollution comes from **factories**, cars, etc.

Trees are good for the environment because they breathe in carbon dioxide.

Although it is a natural gas, it can also be caused by pollution.

Pollution from cars and **another** produces extra carbon dioxide. This is a problem. If there is too much carbon dioxide in the atmosphere, the temperature on the earth will increase. This is called global warming.

If the earth gets hotter, the ice in the Arctic and Antarctica will melt more quickly. The sea will get higher and this will cause floods. Dry places will become deserts. If these places become deserts, crops will not be able to grow. If we don’t have crops for food, it will become very difficult for us to live.

So what can we do about the problem? First, we need to plant more trees, because these breathe in carbon dioxide. We are cutting down too many trees. We also need to find **another** that cause less pollution.
1 Underline the verbs in these sentences

1 If there is too much carbon dioxide in the atmosphere, the temperature on the earth will increase.
2 If the earth gets hotter, the ice in the Arctic and Antarctica will melt more quickly.
3 If these places become deserts, crops will not be able to grow.
4 If we don’t have crops for food, it will become very difficult for us to live.

2 Make first conditional sentences

1 If Hamdi goes to university, he will get a good job.
2 If you go to London, you will see Tower Bridge.
3 If Waleed reads this book, he will learn about the Ancient Egyptians.
4 If they don’t buy tickets, they won’t see the tennis match.
5 If I see Hassan, I will tell him about our family party.
6 If you don’t listen, you won’t understand the lesson.

3 Complete the following sentences

1 If it’s very hot tomorrow, I’ll stay inside.
2 If I finish my homework early, I’ll watch TV.
3 If my mother is tired tonight, she’ll go to bed early.
4 If you phone me tonight, I’ll be very happy.

The first conditional
• We use the first conditional to talk about something that we think will probably happen in the future:
  If Ali studies hard, he will pass his test.
• The form is If + present simple, will / won’t + infinitive
  If Mona is quick, she will catch the bus.
  If it is windy tomorrow, they won’t go to the beach.
• When the if clause starts a sentence, you always add a comma. However, you can put the if clause at the end of a sentence. You do not need a comma:
  Mona will catch the bus if she is quick.
Lesson 3

1. How can we look after the environment? Choose the correct words
   1. It is best to use warm / very hot water for washing clothes.
   2. You can save energy if you have a three-minute / eight-minute shower.

4. What quantities do you know? Make sentences about the following

   people in the class
   people in the school
   Egypt
   the world
Plants and trees are good for farmers. Their roots help to keep water in the soil. So what happens if we do not have trees or plants?

- If we cut down the plants and trees (for example to build houses or to keep animals), the soil will become drier. Wind and rain can carry the soil away. If this continues for a long time, desertification happens. This means that the area becomes a desert.

- About 16 percent of the world’s people live with the problem of desertification. To help stop it, farmers around the world are planting more trees in dry areas.

- In the Luxor area, farmers are helping to stop desertification by growing plants called Jatropha. These plants have big green leaves and they can grow in very dry soil. They are very easy to grow. If a piece of a plant is cut off and put into the soil, a new plant grows.

- The seeds of the plants contain oil. It can be used as a fuel which causes less pollution than petrol. In this way, the Jatropha plant protects the environment, as well as the soil.

**1 Match these words with the pictures**

- Petrol  
- leaves  
- root  
- seed

**2 Answer these questions**

1. How do plants and trees help farmers?
   
   Their roots help to keep water in the soil.

2. Why are plants and trees cut down?
   
   Give two reasons.

3. How is soil carried away in nature?
   
   Give two ways.

4. How many people live with the problem of desertification?

5. Where can Jatropha plants grow?

6. How does the seed of the Jatropha plant help the environment?

**3 Critical Thinking**

2. Why is it important to save water?

3. What can we do to help stop pollution of our air and water?

We use the following words and phrases to show that something is an opinion, not a fact.

- **In my opinion**, people waste a lot of water.
- **I believe (that)** we can all help to stop pollution.
- **I think (that)** global warming is a big problem in the world.
- **I feel (that)** we could all recycle more.
Lesson 1

1) Complete the newspaper article about global warming with these sentences

a. However, this time, things are very different.
b. If global warming gets worse, will it cause other natural disasters like earthquakes and volcanoes?
c. Earthquakes caused a lot of damage.

We know that global warming causes floods. 1. The scientist and writer Bill McGuire has researched natural disasters. In his book about global warming he gives us some very interesting answers to this question.

Twenty thousand years ago, ice covered more than half of the earth. Over the next fifteen thousand years, the atmosphere became warmer. The ice began to melt and this made rivers and lakes. The sea became higher and there was less ice. There was less weight on the earth, so it began to move. 2. Earthquakes under the sea caused many floods. The changes in the earth also caused volcanoes to send out hot mud and gas from inside the earth.

Will this happen again if the atmosphere gets warmer? Scientists are not sure. However, the ice around the Arctic is melting and we know that the sea is getting higher. 3. Now, we all know that we have to look after our world. If we understand global warming, we will be able to stop it. If we stop global warming, the earth won’t be in danger.

2) Answer these questions

1. What is Bill McGuire’s book about?
   *It is about global warming.*

2. What was different about the earth twenty thousand years ago?

3. How did the earth’s temperature change over the next fifteen thousand years?

4. The underlined word disasters means *events that cause something*
   a. good        b. natural        c. bad        d. warm

5. What is made when ice that covers the earth melts?
   a. global warming       b. rivers and lakes       c. earthquakes       d. volcanoes

6. What do earthquakes under the sea cause?
   a. droughts       b. floods       c. hot mud and gas       d. desertification

3) Find four examples of first conditional sentences in the article

1. *If global warming gets worse, will it cause other natural disasters like earthquakes and volcanoes?*

2. ...........................................................

3. ...........................................................

4. ...........................................................
Lesson 2

2 How did Ahmed’s father say he was going to travel there?

3 What does Ahmed want to see?

4 What does Ahmed have to do tomorrow?

5 What did Ahmed’s father say to him about work?

2 Look at the list. What does Ahmed’s father have to do before he goes to the airport? What doesn’t he have to do?

*To do*

- pack bag ✔
- buy plane ticket ✗ (already have one)
- buy train ticket ✗ (can buy in England)
- phone taxi ✗ (Hamdi will take me to airport)
- remember to take English dictionary ✔
- write notes for talk ✔
- buy present for Ahmed in England! ✔

He has to pack his bag.

The water cycle

Water moves around the earth all the time: it is recycled by nature. This is called the water cycle. So what happens?

a. How are clouds formed?
In the sky, these small drops of water are blown together by the wind. When billions of the small drops join together, they form clouds.

b. How is snow made?
Water drops do not always become rain. When it is very cold, water drops turn into ice and fall to the ground. This is snow.

c. What is evaporation?
When the sun shines, it causes the water in rivers, lakes and the sea to evaporate. This means that water is turned from a liquid into a gas. This gas is called water vapour.

d. How is rain made?
If the drops are very big and heavy, they fall through the clouds to the ground. This is rain.

e. What is condensation caused by?
As the water vapour moves up into the air, it becomes cooler. The water vapour changes into very small drops of water. This is called condensation. You can sometimes see condensation on the inside of a window.

Choose the correct answer

1. Evaporation / Condensation is when water turns to water vapour.

2. Water vapour is a liquid / gas.

3. Water vapour moves up into / falls down from the sky.

4. Clouds don’t form when there is no sun / wind.

5. Snow / Rain forms when it is very cold.
Lesson 2

1 Underline the two parts of the verb
   a Water is recycled by nature.
   b How is rain made?
   c How are clouds formed?
   d How is snow made?

Present simple passive questions
- We form the present passive with subject + the present simple of verb
  be + the past participle of the main verb (see the list of irregular past
  participles on WB page 41):
    Clouds are formed in the sky. Rice isn’t grown in England.
- We often use by + noun to say who / what did the action:
    Clouds are blown by the wind.
- We form questions in the present simple passive with (question word) +
  the present simple of be + subject + past participle:
    Is snow formed in the sky? How is rain made?
- In passive questions, we can also ask about who / what did the action:
    What are clouds blown by? Is evaporation caused by the sun? Yes, it is.

2 Ask questions in the present simple passive, then guess
   the correct answer
   1 Where / rice / grow?
      a India        b Scotland       c Germany

   archaeologists: people who look for ancient things under the ground
   ashes: the grey material that is left after a fire
   original: the first of something
   powder: very small bits like sand

   1 What did the ancient Egyptians use soap for?
   2 Why did the Ethiopians first drink coffee?
   3 How was Turkish coffee different from Ethiopian coffee?
   4 What did the ancient Egyptians use to make toothpaste?

Ancient recipes

A papyrus from 1500 BCE shows how soap was made by the ancient Egyptians: fat was mixed with ashes from a fire. The soap was used to wash wool and cotton to prepare the materials to make clothes.

Coffee was discovered in Ethiopia in the eleventh century. At first, the leaves of the coffee plant were boiled in water. The drink was used as medicine. Coffee wasn’t planted outside Ethiopia until the fourteenth century. For 300 years, the original recipe from Ethiopia was used. Later, coffee became popular in Turkey. The coffee beans were cooked over a fire and made into a powder. This was mixed with water and cooked slowly on a fire’s 2 . This recipe was taken all over the world.

Past simple passive

- Like the present simple passive, we use the past simple passive when we don’t know who the subject was, or when the action was more important that the subject / person who did it:
  
  Coffee was used as medicine. The recipes were written last week.

- We form the past simple passive with the past tense of the verb be + (not) + past participle (see the list of irregular past participles on WB page 41):
  
  These cakes were made this morning. Toothpaste wasn’t invented in Europe.

- We often use by + noun to say who did the action:

Windmills

The ancient Egyptians understood that wind can be used to move boats. They used wind energy to sail their boats on the Nile. There are pictures of sail boats from 3,200 BCE.

Windmills were invented in the Middle East in the ninth century. They were used to help make flour from wheat. Travellers took the idea for the windmill to Europe. Today, the same idea is used to make electricity in many countries.

   4. Who travelled in the second spaceship?
   5. How is scientific work on spaceships helping us?

---

**OBJECTIVES**
- Grammar: Past simple passive questions
- Reading: Reading about the International Space Station
- Listening: Listening to people talking about new technology
- Speaking: Describing things
- Writing: Describing an invention

---

**The International Space Station**

Look at the sky at night and you will see hundreds of lights. Most of these are stars. If they are moving, they are probably planes. One moving light, however, is the International Space Station. This has travelled around us every day since 1998, about 400 kilometres above the earth.

**What was the International Space Station built to do?**
The International Space Station was built as a big laboratory for scientists from many different countries. The scientists spend their time studying space and the earth.

**How do the scientists live in space for so long?**
The scientists have all the food, clothes and equipment that they need, but they cannot live in space for long without help. For this reason, the scientists are helped by spaceships from earth.

**What was taken to the International Space Station in 2016?**
Two spaceships left earth to go to the International Space Station in 2016 from Florida, USA. More food was taken on the first spaceship for the scientists as well as new equipment for their experiments. Three more scientists were taken in the second spaceship to join those already in space. So the scientists at the International Space Station have a lot of help. This is important because their work should help us to understand more about space and the earth.
1. Underline the two parts of the verb. Which sentences are in the past passive?

Glasses?
Every year, more and more is known about the stars and planets. Today, scientists use the latest telescopes and computers to study space, but they also use information that was discovered by Egyptians many years ago.

- The ancient Egyptians were some of the first people to study the stars. Glass was made first in Egypt in around 3500 BCE, and people probably used the glass to see the planets better. However, the first telescope was not invented until the sixteenth century.
- From 330 BCE to 168 CE, many famous scientists visited Egypt to study the earth and space. Eratosthenes, from Greece, measured the size of the earth for the first time after he spent time in Aswan. In the second century, Ptolemy of Alexandria wrote a famous book about how the planets and stars moved in space.
- In the eleventh century, buildings called observatories were built around Egypt to study the stars. Today, the observatory at Helwan is called The National Research Institute of Astronomy and Geophysics. It is one of the most important observatories in Africa.

Akram Amin Abdellatif is working hard to become a scientist on a spaceship. The spaceship will be part of a project to study changes to the weather at 130 kilometres above the earth. It will leave from the USA at noon on 27 June 2017.

Abdellatif studied to be a communications engineer at a university in Cairo. He then got two more degrees at universities in Germany. Abdellatif has already worked with scientists on the International Space Station to help develop better medicines in the future.

Abdellatif is not the only Egyptian who wants to go into space. In December 2013, Omar Samra was chosen to travel on a different spaceship’s first flight after he won a space competition in Florida. Samra has a degree in economics, but now spends most of his time travelling and doing charity work. He also gives talks to young people about his experiences. He wants young people to realise that with hard work, anything is possible. He thinks that his journey to space will be the most exciting thing that has happened to him.

5 CRITICAL THINKING

1 Why do you think more people were living in cities in the nineteenth century?
2 Why do you think that detective stories were popular at that time?
One day, Dr Watson visited his friend Sherlock Holmes at his home in London. When he arrived, Sherlock Holmes was talking to a man in his living room. The man’s name was Mr Jabez Wilson. Mr Wilson knew that Holmes was a famous detective who could solve crimes and he wanted him to solve a mystery.

While Mr Wilson was talking, Holmes looked at him carefully. He looked at Mr Wilson’s face, his hands and his clothes. He worked out that Mr Wilson used to be a labourer, that he visited China in the past and that he did a lot of writing. When Sherlock Holmes told Mr Wilson this information, he was very surprised because everything Sherlock Holmes said was true! Mr Wilson decided that Holmes must be a wonderful detective.

Mr Wilson started telling Holmes his story. He had a small shop in London where he worked with his assistant Vincent Spaulding. Not many people visited Mr Wilson’s shop and he wasn’t a rich man. One day, Mr Spaulding showed him an advert in the newspaper for a job with the Red-Headed League.

The Red-Headed League found jobs for men with red hair. Mr Spaulding wanted Mr Wilson to ask about the job because Mr Wilson had red hair and the job was only a few hours a week. The money could really help Mr Wilson and his small shop.

That afternoon, Mr Spaulding took Mr Wilson to the Red-Headed League. There were a lot of men waiting outside the office and they all had red hair. But Mr Spaulding pushed past all the men until they were outside the door. They went inside and met the manager, Mr Duncan Ross, who told them about the job.

The person who got the job would have to come to the office every day between ten and two o’clock. He wouldn’t be able to leave the office during this time. While he was in the office, he would have to copy all the information from a large encyclopedia into a book. The pay was £4 a week. This was a lot of money! Mr Ross told Mr Wilson that if he could start work the next day, he could have the job! Mr Wilson was very surprised but quickly said yes.

Critical Thinking

1. Why do you think Mr Spaulding wanted Mr Wilson to get a job with the Red-Headed League?
2. Do you think it was unusual that Mr Ross gave Mr Wilson the job? Why / Why not?
3. Do you think that Mr Wilson will find it difficult to do both this job and his job in the shop? Why / Why not?
The next day, Mr Wilson bought a pen, some ink and some paper and went to the Red-Headed League. He thought about the job. Could it be real? It seemed foolish to copy an encyclopaedia. But to his surprise, when he arrived at the office Mr Ross was waiting for him. So Mr Wilson sat at the table and started work. He copied information from the encyclopaedia into a book until two o'clock. Then he went home.

Mr Wilson went to the office every day and at the end of the week he received his pay of £4. The work was easy and he was very content. This continued for eight weeks. One day, he went to the office, but it was locked. There was a letter on the door that said “The Red-Headed League has closed”.

Mr Wilson didn’t know what to do. He asked the landlord why the office was closed, but the landlord said that he didn’t know. He said that he didn’t know Mr Ross or the Red-Headed League. It was a mystery and Mr Wilson wanted Sherlock Holmes to solve it.

Holmes asked Mr Wilson some questions about his assistant Mr Spaulding. After Mr Wilson left, Holmes asked Dr Watson to go to a violin concert with him that evening. On the way, they could go past Mr Wilson’s shop.

When they arrived, Holmes walked up to the shop and hit the ground with his walking stick three or four times. Dr Watson thought this was very unusual! Then Holmes knocked on the shop door. A young man answered and Holmes asked him how to get to the concert.

“Did you knock on the door so that you could see the young man who works for Mr Wilson?” asked Dr Watson.

“No, I didn’t want to see the man. I wanted to see the knees of his trousers,” replied Holmes.

Dr Watson thought that that was a very unusual answer. He didn’t understand. But Holmes didn’t explain. He was looking carefully at the different houses and shops behind Mr Wilson’s shop. There was a newspaper shop, a bank and a restaurant. Then it was time to go to the concert, so the two men left.

4 Why do you think Sherlock Holmes wanted to see Mr Spaulding and the shops behind where he worked?
After the violin concert, Sherlock Holmes told Dr Watson that he had to see someone before he went home.

“There is going to be a crime tonight, Watson,” explained Holmes, “and it might be dangerous. Meet me at 221b Baker Street at ten o’clock.”

Dr Watson arrived at Baker Street that evening. Holmes was talking to Peter Jones, the most important policeman in London, and a man called Mr Merryweather. Holmes explained to Watson that they hoped to catch a famous thief called John Clay that night.

The four men got into two taxis. While they were travelling, Holmes told Dr Watson that Mr Merryweather was the manager of the bank behind Mr Wilson’s shop. The taxis were taking them to Mr Merryweather’s bank. When they arrived, Mr Merryweather took them into the bank and down into the cellar. It was dark inside the cellar and there were a lot of large boxes.

Holmes looked carefully at the floor of the cellar. Then he asked Mr Merryweather to tell Dr Watson why the thieves might be interested in this bank.

“They are interested in the gold in the boxes in this cellar,” explained Mr Merryweather. “It is unusual to have so much gold in one bank and we have been worried. We wanted to move it.”

Holmes explained that the thieves were going to come into the cellar under the ground from Mr Wilson’s shop. Now, there were three policemen waiting outside Mr Wilson’s shop. Holmes and the three men were waiting inside the cellar. The thieves wouldn’t be able to escape! Holmes turned out the light and the four men waited for the thieves to arrive.

After about an hour, the men saw something. One of the large square stones in the floor started to move. Suddenly, they saw a hand! The hand slowly moved the stone up and to the right. Then a young man climbed out of the hole and into the cellar. When the young man stood up, Holmes quickly grabbed his arm. It was John Clay!

“John Clay! Your red-headed idea was a good one, but we’ve caught you!” said Holmes.

Sherlock Holmes and Dr Watson returned to Baker Street and Holmes explained the crime to Watson. John Clay had the idea for the Red-Headed League because his friend Mr Ross had red hair. Holmes knew that the job of copying out the encyclopaedia was too foolish to be a real job. Clay and Mr Ross invented the job because they wanted Mr Wilson out of his shop. Why?

Mr Wilson told Holmes that Mr Spaulding often used to work in the cellar. Holmes thought that this was unusual. Holmes asked some questions about Mr Spaulding and found out that he was John Clay the thief! When Holmes knocked on the door of the shop, he saw that the knees of Mr Spaulding’s trousers were dirty and had holes in them. Holmes deduced that he was digging a tunnel with Mr Ross when Mr Wilson was not in the shop.

“When I saw that the bank was behind Mr Wilson’s shop, I knew why they were digging a tunnel,” said Holmes. “They wanted to take the gold from the bank!”

“How did you know that they wanted to take the gold on Saturday night?” asked Watson.

“When they closed the Red-Headed League, I knew the tunnel was finished. If they took the gold from the bank on Saturday, they would have a day and a half to escape before the bank opened on Monday,” replied Holmes.

“Well done, Holmes!” said Watson.
